---

### EDUCATION

Amity University, Gwalior  
Bachelor of Technology in Computer Science, CGPA: 7.50

Madhya Pradesh, India  
Aug 2021 – July 2025

---

### SKILL SUMMARY

Language: Java, JavaScript, Sql  
Frameworks: MongoDB, Express.js, React.js, Node.js, Angular, Vue.js, jQuery, Bootstrap, Tailwind  
Tools: React, Webpack, AngularJS, Npm, Vue.js, Atom  
Platform: Visual Studio Code, Sublime Text, Node.js  
Soft Skill: Problem Solving, Analytical Thinking, Adaptability, Continuous Learning, Attention to Detail

---

### WORK EXPERIENCE

#### Full Stack Developer Intern | Remote

Oct 2025 – Present

##### *Purple Merit Technologies*

- Developing and maintaining dynamic web applications using the **MERN stack (MongoDB, Express.js, React.js, Node.js)**.
- Collaborating with cross-functional teams to design and implement responsive, scalable, and user-friendly web solutions.
- Writing clean, efficient, and reusable code following industry best practices.
- Integrating RESTful APIs and managing backend logic for seamless data flow between client and server.
- Implementing authentication and authorization using **JWT** for secure user access and route protection.
- Participating in code reviews, debugging sessions, and performance optimization to ensure high-quality deliverables.

#### Backend Developer Intern | Remote

##### *Shunya Ekai Technologies.*

Apr 2025 – July 2025

- Developed and maintained scalable backend services for enterprise applications.
- Designed and implemented RESTful APIs using Node.js and Express.js.
- Optimized database queries and managed data using MongoDB.
- Ensured secure data handling and followed best practices in backend development.
- Collaborated with frontend developers and product teams in agile sprints.
- Used Git for version control and efficient code collaboration.

#### Outlier | Remote

Nov 2024 – Mar 2025

##### *Freelance AI Trainer*

- Evaluated, enhanced, and optimized AI-generated code in C++, Python, and Go to improve correctness, efficiency, and adherence to best practices.
- Designed and applied evaluation rubrics to measure model quality, reducing errors and increasing code generation reliability by ~30%.
- Tech Stack: C++, Python, Go, Prompt Engineering, LLMs, Git, VS Code, Slack

#### Chegg | Remote

Dec 2023 – Nov 2024

##### *Subject Matter Expert (Computer Science)*

- Researched, solved, and uploaded high-quality, step-by-step solutions for Computer Science questions, ensuring accuracy, clarity, and adherence to academic integrity guidelines.
- Addressed topics across data structures, algorithms, databases, operating systems, and software engineering, providing comprehensive explanations to aid student learning.
- Reviewed and revised solutions based on feedback to maintain a high solution acceptance rate (>95%).
- Tech Stack: C++, Python, SQL, Data Structures, Algorithms, Operating Systems, Software Engineering, Git, MS Office

---

### CERTIFICATES

- Certified Backend Developer – micro1** | As a Backend Developer, validating my skills in backend development, problem-solving, and building scalable applications.
- Certified Oracle Cloud Infrastructure 2025 DevOps Professional**, demonstrating expertise in CI/CD, automation, and cloud infrastructure.
